INTRODUCING OUR RT COLLECTION

Choose Ride Technology™ versions for the highest level of performance. RT series use a combination of high performing trucks (Tracker RT/S, RT/X combo, ABEC7 bearings and spacer, and ABEC11 cast urethane wheels) that complement each board's new suspension. RT Specifics on components used are detailed in each product page below. According to Ebone, the Tracker setup turns about 50% tighter for better carves and with the ABEC11 wheels, you stick when you need to, slide when you want to.

WASTELAND HAZARDS

These icons were created for the prospective citizens of the post-nuclear apocalyptic society that may or may not exist in the future, in hopes that someday, these icons will be unearthed from the radioactive debris, used to alert potential passerbys of the completely authentic dangers of the wasteland, and hopefully, guide them to safety.
